Arash Asgari PH.D.

arash.asgari@rotman.utoronto.ca

ACADEMIC EMPLOYMENT

Postdoctoral Fellow Sep 2025- Present
Rotman School of Management, University of Toronto Toronto, Canada
- Advisors: Opher Baron, Nasser Barjesteh

EDUCATION

Alberta School of Business, University of Alberta Edmonton, Canada
PhD in Operations Management 2025
- Advisor: Saied Samiedaluie
- Thesis Topic: Queueing models with stochastic agent unavailability

Industrial Engineering, Sharif University of Technology Tehran, Iran
MSc in Systems Optimization 2019

Industrial Engineering, Sharif University of Technology Tehran, Iran
BSc in Industrial Engineering 2016

WORKING PAPERS

- **A. Asgari**, O. Baron, N. Barjesteh (2026). Dynamic scheduling and pricing of battery-Swapping networks for sustainable electric mobility.
- **A. Asgari**, A. Ingolfsson, S. Samiedaluie (2026). Formulation and validation of a model for transient analysis of queueing systems with stochastic agent unavailability. (R & R, Operations Research)
- **A. Asgari**, A. Rastpour, S. Samiedaluie (2026). Solving queueing systems with impatient customers and stochastic agent unavailability using matrix-analytic methods. (Performance Evaluation)
- **A. Asgari**, A. Rastpour, S. Samiedaluie (2026). Asymptotic analysis of queueing systems with impatient customers and stochastic agent unavailability. (Finalist, CORS Student Paper Competition, Applied Probability and Queueing SIG 2025)

WORK IN PROGRESS

- **A. Asgari**, S. Samiedaluie, I. Lee. Optimizing exam room allocations to physicians in the surgical clinic of a children's hospital.
- **A. Asgari**, S. Samiedaluie, H. Abouee Mehrizi, M. Zargoush. Optimizing decisions regarding admission to clinical decision units.

RESEARCH INTERESTS

- Applications: Service operations, pricing and revenue management, healthcare operations
- Methodology: Applied probability, queueing theory, stochastic control, asymptotic analysis

TEACHING EXPERIENCE

Instructor: University of Alberta
- OM 420: Predictive Business Analytics (Instructor rating: 4.2/5) Fall 2022
- OM 420/620: Predictive Business Analytics Winter 2022

Teaching Assistant: Alberta School of Business, University of Alberta
- BUEC 420/686: Data Science and Business Economics (Instructor: Longzhou Wang) Winter 2025
- BUEC 488/686: Data Analysis for Business Economics and Policy (Instructor: Longzhou Wang) Winter 2024

Teaching Assistant: Sharif University of Technology
- Operation Research I (Instructor: Kourosh Eshghi) Fall 2018, Spring 2018 & 2019
- Engineering Statistics (Instructor: Majid Khedmati) Spring 2019
- Inventory Management I (Instructor:Alireza Haji) Spring 2019
- Inventory Management I (Instructor: Babak Haji) Fall 2018
- Project Scheduling (Instructor: Majid Rafiee) Spring 2015

Academic Service

Ad-hoc Journal Reviewer:

- Operations Research
- Manufacturing & Service Operations Management
- INFORMS Journal on Computing
- Health Care Management Science
- IEEE Signal Processing Letters
- Service Science
- Performance Evaluation

Professional Experience

- **Management Trainee**, Digikala E-Commerce company, Tehran, Iran Jan 2018-Jun 2018
- **Project Management Assistant**, Andishgaran Sepehr Ara consulting engineers company, Tehran, Iran Aug 2016-Dec 2016
- **Layout improvement consultant (Intern)**, Nasir Machine Industrial Group, Golpayegan, Iran Jun 2015-Jul 2015
- **Tutor**, for BSc courses, such as Project Control and Scheduling, Probability, Statistics, Simulation, Accounting, Operation Research I and II, Inventory Control, Plant Layout, Quality Control Aug 2016-Apr 2019

Conference Presentations

Asymptotic analysis of queueing systems with impatient customers and stochastic agent unavailability

- CORS, Edmonton, Canada 2025
- CanQueue, Edmonton, Canada 2024

Formulation and validation of a model for transient analysis of queueing systems with stochastic agent unavailability

- CORS, London, Canada 2024
- CORS, Montreal, Canada 2023

Solving queueing systems with impatient customers and stochastic agent unavailability using matrix-analytic methods

- CanQueue, Niagara-on-the-Lake, Canada 2023

Model validation for the call center of a non-profit organization

- Business PhD Research Conference, Edmonton, Canada 2022
- Business PhD Research Conference, Edmonton, Canada 2021
- CanQueue, Montreal, Canada 2021

Staffing the surgical short-stay unit at a children's hospital

- Business PhD Research Conference, Edmonton, Canada 2020

Awards and Honors

- **Eric Geddes/Alberta Innovates Fellowship in Health Organization Studies** 2024
- **Life Underwriters Fellowship for PhD Research in Insurance and Related Financial Services** 2023
- **Eric Geddes/Alberta Innovates Fellowship in Health Organization Studies** 2022
- **Ranked 3rd in GPA in M.Sc. Industrial Engineering Department at Sharif University of Technology** 2018

Software Skills

Statistical: Stata, SAS.

Operation Research: Gurobi, CPLEX.

Programming: R, Python, MATLAB.

Simulation: Simmer.
